

## Corps of Engineers, Dept. of the Army, DoD

## § 209.50

Cherry Valley Reservoirs as are required to accomplish the flood-control objectives of the regulations of this section.

(l) The City shall keep the District Engineer, Corps of Engineers, in charge of the locality, and the Districts currently advised of reservoir releases, reservoir storages, basic operating criteria which affect the schedule of operations, and such other operating data as the District Engineer, Corps of Engineers, may request for Hetch Hetchy, Eleanor, and Cherry Valley Reservoirs.

(m) The Districts shall keep the District Engineer, Corps of Engineers, in charge of the locality, and the City currently advised of reservoir releases, reservoir storages, basic operating criteria which affect the schedule of operations, and such other operating data as the District Engineer, Corps of Engineers, may request for Don Pedro Reservoir.

(n) The flood-control regulations of this section are subject to temporary modification by the District Engineer, Corps of Engineers, if found necessary in time of flood emergency. Request for and action on such modifications may be made by any available means of communication, and such action shall be confirmed in writing under date of same day to the operating agency for the reservoir affected.

### PART 209—ADMINISTRATIVE PROCEDURE

Sec.

209.50 Mississippi River Commission: Public observation of Commission meetings.

209.138a Authorization for exploratory drilling in the Gulf of Santa Catalina, Calif.

209.140 Operations of the Corps of Engineers under the Federal Power Act.

209.141 Coordination of hydroelectric power operations with power marketing agencies.

209.155 Expenditure of Federal funds for work shoreward of harbor lines.

209.160 The California Debris Commission.

209.170 Violations of laws protecting navigable waters.

209.180 Temporary closure of waterway to navigation.

209.190 [Reserved]

209.200 Regulations governing navigable waters.

209.220 Flood control regulations.

209.230 Use of reservoir areas for recreation.

209.300 Flood control regulations.

209.310 Representation of submarine cables and pipelines on nautical charts.

209.315 Public access to navigation works.

209.320 Policy on release of commercial statistics.

209.325 Navigation lights, aids to navigation, navigation charts, and related data policy, practices and procedure.

209.335 Publication.

209.340 Laboratory investigations and materials testing.

209.345 Water resource policies and authorities.

APPENDIX A TO PART 209—PUBLIC LAW 90-483, 90TH CONGRESS, S. 3710, AUGUST 13, 1968

AUTHORITY: 5 U.S.C. 301; 33 U.S.C. 1; 10 U.S.C. 3012.

SOURCE: 33 FR 18670, Dec. 18, 1968, unless otherwise noted.

### § 209.50 Mississippi River Commission: Public observation of Commission meetings.

(a) *Purpose.* (1) The purpose of this regulation is to afford to the public, to the fullest possible extent, information regarding the decisionmaking processes of the Mississippi River Commission and to open all meetings of the Mississippi River Commission to public observation except in instances where a portion or portions of a meeting may be closed to the public in accordance with this regulation in order to protect the rights of individuals and/or in order to permit the Mississippi River Commission to carry out its statutory and assigned functions and responsibilities. This regulation is issued in accordance with section (g) of the Government in the Sunshine Act and implements sections (b) through (f) of said Act (5 U.S.C. 552b (b) through (f)).

(2) Public observation of Mississippi River Commission meetings includes public participation in the deliberations of the Commission only to the extent specifically provide in public notices of such meetings.

(b) *Definitions.* The following definitions apply to the regulation in this section.

(1) *Commission* means The Mississippi River Commission.

(2) *President* means the duly appointed President and Executive Officer of the Commission.

(3) *Commissioner* means a duly appointed member of the Commission.

(4) *Secretary* means the Secretary of the Commission.

(5) *Chief Legal Officer* means the Division Counsel or the acting Division Counsel of the Lower Mississippi Valley Division, Corps of Engineers.

(6) *Meeting* means the deliberations of at least a majority of the Commissioners where such deliberations determine or result in the joint conduct or disposition of official Commission business, but does not include:

(i) Deliberations of the Commission in determining whether or not to close a portion or portions of a meeting in accordance with paragraphs (e)(4) and (e)(5) of this section.

(ii) Deliberations of the Commission in determining whether or not to withhold from disclosure information pertaining to a portion or portions of a meeting as provided in paragraphs (e)(4) and (e)(5) of this section.

(iii) Deliberations of the Commission pertaining to changes in the subject matter of a meeting or changes in the determination to open or close a portion or portions of a meeting to the public following the public announcement of such meeting in accordance with paragraph (d)(4) of this section.

(iv) Deliberations of the Commission in determining whether to waive the one-week public notice requirement in accordance with paragraph (d)(2) of this section.

(c) *Time, place, and agenda of meetings.*

(1) The meetings of the Commission, except those held on Government boats during inspection trips of the Commission, shall be held at Vicksburg, Mississippi. The time of such meetings shall be fixed by the President of the Commission, who shall cause due notice of such meetings to be given members of the Commission and the public.

(33 U.S.C. 646)

(2) The President shall, after consultation with the Commissioners, prepare a detailed agenda for planned Commission meetings at the earliest practicable time. Suggestions from the public of proposed agenda items are invited.

(d) *Public notices and Federal Register publication.* (1) At least one week before each Commission meeting the Secretary shall issue a public announce-

ment which (i) States the time and place of the meeting,

(ii) Lists the agenda items or subjects to be discussed at the meeting,

(iii) States whether the meeting or portions of the meeting are to be closed or open to public observation,

(iv) States whether or not public participation in the meeting will be permitted, and

(v) States the name and business phone number of the official who will respond to requests for information about the meeting. Public announcements of Commission meetings shall include releases to the news media in the Lower Mississippi River Valley and mailing notices of such meetings to all persons and agencies known to have an interest in the Commission's work and to others who request such announcements.

(2) The one-week period for public notice required by paragraph (d)(1) of this section shall not be applicable when a majority of the entire membership of the Commission determines by a recorded vote that Commission business requires that a meeting be called at an earlier date. The Secretary shall, however, issue the public notice required by paragraph (d)(1) of this section at the earliest practicable time.

(3) When due to unforeseen circumstances it is necessary to change the time or place of a meeting following the public announcement required by paragraph (d)(1) of this section, the Secretary will publicly announce such change at the earliest practicable time.

(4) The subject matter of a meeting, or the determination of the Commission to open or close a portion or portions of a meeting to the public, may be changed following the public announcement required by paragraph (d)(1) of this section only if: (i) A majority of the entire membership of the Commission determines by a recorded vote that Commission business so requires and that no earlier announcement of the change was possible, and (ii) the Secretary publicly announces such change and the vote of each member on such change at the earliest practicable time.

(5) Immediately following each public announcement required by this section,

notice of the time, place, and subject matter of a meeting, whether a portion or portions of the meetings are open or closed to public observation, any change in one of the preceding, and the name and business telephone number of the official of the Commission who will respond to requests for information about the meeting, shall be submitted for publication in the FEDERAL REGISTER.

(e) *Closing a portion or portions of a meeting.* (1) All Commission meetings shall be open to the public except when the Commission determines that public disclosure of information to be discussed in a portion or portions of a meeting is likely to:

(i) Disclose matters that are (A) specifically authorized under criteria established by Executive order to be kept secret in the interests of national defense or foreign policy and (B) in fact properly classified pursuant to such Executive order;

(ii) Relate solely to the internal personnel rules and practices of the Commission;

(iii) Disclose matters specifically exempted from disclosure by statute [other than the Freedom of Information Act (5 U.S.C. 552)], provided that such statute: (A) Requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue, or (B) establishes particular criteria for withholding or refers to particular types of matters to be withheld;

(iv) Disclose trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(v) Involve accusing any person of a crime, or formally censuring any person;

(vi) Disclose information of a personal nature when disclosure would constitute a clearly unwarranted invasion of personal privacy;

(vii) Disclose investigatory records compiled for law-enforcement purposes, or information which, if written, would be contained in such records. But only to the extent that the production of such records or information would: (A) Interfere with enforcement proceedings, (B) deprive a person of a right to a fair trial or to an impartial

adjudication, (C) constitute an unwarranted invasion of personal privacy, or (D) disclose the identity of a confidential source, and, in the case of a record compiled by a criminal law-enforcement authority in the course of a criminal investigation or by an agency conducting a lawful national-security intelligence investigation, confidential information furnished only by the confidential source;

(viii) Disclose information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed Commission action except: (A) When the Commission has already disclosed to the public the content or nature of its proposed action or (B) when the Commission is required by law to make such disclosure on its own initiative prior to taking final Commission action on such proposal;

(ix) Specifically concerns the Commission's participation in a civil action or proceeding.

(2) In each instance where the Commission determines that a portion or portions of a meeting may be closed to the public, or determines that information may be withheld from the public for one or more of the exemptions listed in paragraph (e)(1) of this section, the Commission shall consider and determine whether or not the public interest requires that the portion or portions of the meeting be open to the public and whether or not the public interest requires that the information be released to the public.

(3) Whenever any person whose interest may be directly affected by a portion of a meeting requests that the Commission close such portion to the public for any of the reasons referred to in paragraph (e)(1) (v), (vi) or (vii) of this section, the Commission, upon the request of any one of its members, shall vote by recorded vote whether to close such meeting.

(4) Action to close a portion or portions of a meeting for one or more of the reasons listed in paragraphs (e)(1) (i) through (ix) of this section, or to withhold information from the public for one or more of the reasons listed in paragraphs (e)(1) (i) through (ix) of this

section shall be taken only when a majority of the entire membership of the Commission votes to take such action.

(5) A separate recorded vote of the Commission shall be taken with respect to each meeting a portion or portions of which the Commission proposes to close to the public, and a separate vote of the members of the Commission shall be taken to determine whether to withhold information from the public. The vote of each Commissioner participating in such vote shall be recorded and no proxies shall be allowed.

(6) Within one day of any vote taken pursuant to paragraphs (e)(4) and (e)(5) of this section, the Commission shall make publicly available a written copy of such vote reflecting the vote of each member on the question. If a portion or portions of a meeting are to be closed to the public, the Commission shall within one day of the vote taken pursuant to paragraphs (e)(4) and (e)(5) of this section make publicly available a written explanation of its action in closing a portion or portions of the meeting together with a list of all persons expected to attend the meeting and their affiliations.

(7) For every portion or portions of a meeting closed pursuant to paragraphs (e)(1) (i) through (ix) of this section, the Chief Legal Officer of the Commission shall publicly certify that, in his or her opinion, the meeting may be closed to the public and shall state each relevant exemptive provision. A copy of such certification, together with a statement from the presiding officer of the meeting setting forth the time and place of the meeting, and the persons present, shall be retained in the Commission files.

(f) *Records.* (1) The Secretary shall maintain in the official files:

(i) A complete transcript or electronic recording (disclosing the identity of each speaker) adequate to record fully the proceedings of the Commission at a portion or portions of a meeting closed to the public for the reasons specified in paragraphs (e)(1) (i) through (ix) of this section.

(ii) The statement of the presiding officer of each Commission meeting, a portion or portions of which were

closed to the public, as required by paragraph (e)(7) of this section.

(iii) The certification of the Chief Legal Officer, as required by paragraph (e)(7) of this section, for each Commission meeting, a portion or portions of which were closed to the public.

(2) The records required by paragraph (f)(1) of this section shall be retained for at least two years following any meeting or not less than one year following conclusion of Commission action with respect to any matter discussed at such meeting, whichever occurs later.

(g) *Public access to records.* (1) All records required to be maintained in accordance with the provisions of (f)(1) of this section shall promptly be made available to the public by the Secretary except for information which the Commission has determined may be withheld from the public for the reasons stated in paragraphs (e)(1) (i) through (ix) of this section.

(2) Public inspection of such records shall take place at the headquarters of the Mississippi River Commission, 1400 Walnut Street, Vicksburg, Mississippi 39180.

(3) The Secretary shall provide (subject to withholding of information for the reasons stated in paragraphs (e)(1) (i) through (ix) of this section) upon request of any person, copies of the records required by the provisions of (f)(1) of this section, including transcriptions of electronic recordings at the actual cost of transcription or duplication.

(5 U.S.C. 552b)

[42 FR 13286, Mar. 10, 1977]

**§ 209.138a Authorization for exploratory drilling in the Gulf of Santa Catalina, Calif.**

(a) Department of the Army authorization is required pursuant to section 4(f) of the Outer Continental Shelf Lands Act of 1953 (67 Stat. 462; 43 U.S.C. 1333(f)) in coastal waters and the water covering the Outer Continental Shelf. The determination whether or not to issue a Department of the Army authorization for structures on the Outer Continental Shelf related to exploration of minerals is based upon the proposed activities' effect on navigation and national security. All other

matters concerning offshore drilling, including environmental considerations, are the responsibility of the Department of the Interior.

(b) The following rules have been developed jointly by the Los Angeles district engineer and the 11th Coast Guard District, in consultation with the Bureau of Land Management and the U.S. Geological Survey for drilling in the Gulf of Santa Catalina:

(1) All drilling with a single tract will be covered by a single application.

(2) Where practicable, applications shall be submitted at least 120 days in advance of drilling for tracts where drilling is expected to be accomplished within the traffic separation scheme, the precautionary zone or within 2 nautical miles of a traffic lane.

(3) Applications shall include the location of any known proposed drilling site and the estimated start and completion dates for each. Updated information on the plan shall be furnished as soon as available. One individual (and alternate) shall be designated by the applicant as responsible for maintaining close liaison with all involved agencies.

(4) Where it is not feasible to perform exploratory work from outside the traffic lanes or  $\frac{1}{4}$  mile buffer zones, or precautionary zone, authorizations will include the following conditions:

(i) Exploratory vessels within a traffic lane will, to the degree practicable, be sited near traffic lane boundaries.

(ii) Exploratory vessels within one traffic lane, or in the precautionary zone, shall be separated by at least 8 nautical miles in the direction of the lane axis.

(iii) Exploratory vessels located within the traffic lanes, or the precautionary zone, shall not have their pendant buoys within 3,000 yards from the pendant buoys of any other vessel.

(iv) Exploratory rigs and vessels engaged in offshore development may have no cables, anchors, buoys, or other associated equipment within the traffic lanes,  $\frac{1}{4}$  mile buffer zones, or the precautionary zone, at a depth of less than 100 feet, unless such equipment is marked with class I private

aids to navigation in accordance with current Federal regulations.

(67 Stat. 462 (43 U.S.C. 1333(f))

[43 FR 28475, June 30, 1978]

#### **§ 209.140 Operations of the Corps of Engineers under the Federal Power Act.**

(a) *General.* This section outlines policies and procedures applicable to those operations in which the Corps of Engineers may be called upon to participate under the Federal Power Act. Such operations include: Investigations and reports on applications for permits and licenses for development of power affecting navigable waters; supervision of investigations, construction, and operation of projects under such permits and licenses; preparation of special reports as required by the Federal Power Commission; and review of plans of dams or other structures affecting navigation. The foregoing functions are performed by the Corps of Engineers only upon request of the Federal Power Commission.

(b) *Authority of Division and District Engineers.* Section 2 of the revised Federal Power Act provides that the Federal Power Commission may request the President to detail an officer or officers from the Corps of Engineers, or other branches of the United States Army, to serve the Commission as Engineer officer or officers, or in any other capacity, in field work outside the seat of government, their duties to be prescribed by the Commission. By authority of the Secretary of the Army, and in accordance with the instructions issued by the President in a letter to the Secretary of the Army dated May 18, 1931, Division Engineers will be detailed to serve the Commission as engineer officers in field work outside the seat of government, their duties to be prescribed by the Commission, and to be performed under the supervision of the Chief of Engineers. District Engineers will be designated to carry out the field inspections and investigations under supervision of the Division Engineer. When a Division Engineer is detailed by the Chief of Engineers to assist the Commission in either the investigation or supervision of

a project he will be the accredited representative of the Commission. The actual field work will be done by the designated District Engineer who will make a report to the Division Engineer. All reports and such correspondence as would normally be forwarded to the Commission will be addressed to the Chief of Engineers.

(c) *Procedure for investigations and report on applications for permits and licenses.* (1) Upon request by the Federal Power Commission, the Chief of Engineers will assign the investigation of an application for permit or license under the Federal Power Act to a Division Engineer, who will submit a report on the investigation as provided herein. The date that the report is to be submitted will be specified. The Division Engineer, upon assignment of an investigation involving extensive studies, will when requested by the Chief of Engineers submit an estimate of the cost of the investigation, listing the probable expenditures for salaries separate from the estimated costs of non-personal services.

(2) If in the investigation of an application or a declaration of intention filed under the Federal Power Act the Division Engineer considers a public hearing desirable in the interests of navigation or flood control, the Chief of Engineers will be notified whereupon the matter will be brought to the attention of the Commission. No public hearing will be held unless specifically authorized by the Commission or by the Chief of Engineers. If a hearing is authorized it will be limited strictly to consideration of the purpose for which approval is granted.

(3) The report will describe and discuss material facts having a definite bearing on the interests of navigation and flood control and the general effect the project would have on a comprehensive plan of developing the water resources of the basin. Specific reference will be made to pertinent published documents containing the results of studies and/or resolutions directing studies to be made. In the case of an application for permit or license for an unconstructed project the report will include a recommendation as to whether development should be undertaken by the United States rather than

by a licensee. A recommendation for Federal development will be supported by a showing as to how this would serve the Corps of Engineers programs and policies. In the case of an application for permit or license for a constructed project the report should contain appropriate comments concerning possible redevelopment to improve the usefulness of the project in relation to the objectives of the Corps program in the basin.

(4) The report on an application for license will contain recommendations of the Division Engineer concerning the inclusion in the license of any terms and conditions that are considered to be necessary or desirable in the public interest from the standpoint of Corps of Engineers responsibilities.

(5) The report on an application for permit will contain such recommendations as required to insure coordination of the applicant's studies with the Division or District Engineer in cases where interests of the Corps of Engineers are involved. In all cases, the report will contain, in lieu of specific recommendations, a discussion of interests which should be protected by articles in a license issued subsequent to the permit period.

(6) If the project is on a Federal reservation or contemplates the use of a dam, either of which is under the jurisdiction of the Department of the Army, the report should state, giving reasons:

(i) Whether the project will interfere or be inconsistent with the purpose for which such reservation was created or acquired and what conditions, if any, should be imposed for the adequate protection and utilization of the reservation.

(ii) Whether the dam may be advantageously used by the United States for public purposes in addition to authorized purposes and whether it should be reserved for such use.

(iii) Whether the development should be undertaken by the United States.

(7) The reports will not be released or made public except by specific authority of the Chief of Engineers, nor will copies of a report, its findings, or recommendations be furnished to the applicant, to interested parties, or to the Commission until released by the Chief of Engineers.

(d) *Procedure for supervision of operations under permits and licenses.* (1) When supervision of the operations of an applicant under a permit or a license is requested by the Federal Power Commission, the Chief of Engineers will assign responsibility for supervision to the Division Engineer. The operations to be supervised, such as investigations being conducted by a permittee, construction of a project under a license or operation of completed projects, will be as specified by the Commission.

(2) Projects will be classified as major, minor, minor part or transmission line projects as indicated in the Federal Power Act and as specified in the instructions from the Commission.

(3) Inspection during the construction of a major project will be made monthly, or as often as may be necessary for the Division Engineer to assure himself that the terms of the license are being complied with and the work is of acceptable quality and in accordance with the approved plans. The frequency of inspections of minor, minor part, and transmission line projects is left to the discretion of the Division Engineer.

(4) After a project has been completed and placed in operation and is under the supervision of the Division Engineer, annual inspection will be made of major and minor projects but inspection of transmission line projects will not be made unless specifically requested by the Commission.

(5) Reports on supervision and inspections of operations under Federal Power Commission permits and licenses will be submitted in accordance with instructions in paragraph (e) of this section.

(e) *Reports on supervision and inspection of operations under Federal Power Commission permits licenses.* Periodic reports, as appropriate to assigned responsibilities and as described in paragraphs (e) (1) through (3), inclusive, of this section will be submitted for each Federal Power Commission permit or license for which a Division Engineer has been assigned responsibility for supervision of operations under provisions of the Federal Power Act. All of the described reports will be submitted

in triplicate to the Chief of Engineers for transmittal to the Federal Power Commission. Unless otherwise stated transmittal letters will not be required and the reports will be mailed so as to reach the Chief of Engineers not later than the 15th of the month following the end of the report period.

(1) *Reports on supervision of construction under a FPC License.* When a Division Engineer is assigned responsibility for supervision and inspection of construction of a licensed project, the requirements for submission of reports will be specified.

(2) *Annual Report on operation of project under supervision of the Division Engineer.* Reports on the operation and maintenance of each major and minor licensed project for which supervision of operations has been assigned to a Division Engineer will be submitted annually after the initial installation covered by the license has been completed. Such reports will be made on Federal Power Commission Form 10, "Operation Report" and, pursuant to paragraph 39u of AR 335-15, do not require a reports control symbol. A special report will be made in case of severe flood or interruption in operation due to failure of material or accident. Reports on operation and maintenance of transmission line projects are not required unless requested by the Commission.

(3) *Annual Report on operation of projects with licenses containing conditions prescribed in the interest of navigation.* When the Federal Power Commission notifies the Chief of Engineers that it will assume the supervision of operation of a licensed project, the Division Engineer will not be required to make detailed inspections and reports. However, the Division Engineer will continue to be responsible for the project insofar as it affects the interest of navigation. The inspection of projects in this class is left to the discretion of the Division Engineer but annual reports will be submitted in triplicate, through the Chief of Engineers, on Federal Power Commission Form 10, "Operation Report", omitting the items under "Supervision expense for period", but including the following information only under "Memorandum Report".

(i) Whether the operation of the project has been satisfactory insofar as the interests of navigation are concerned.

(ii) Whether any infraction by the licensee of the conditions in the interest of navigation has come to the attention of the Division Engineer.

(f) *Delegation of authority for approval of structural plans for non-Federal hydroelectric projects affecting navigation.* The authority vested in the Secretary of the Army by section 4(e) of the Federal Power Act is hereby delegated to the Chief of the Engineers for promulgation with regard to approval of plans of structures filed with the Federal Power Commission in connection with licensing of non-Federal hydroelectric projects.

(Sec. 4(e), 49 Stat. 840; 16 U.S.C. 797(e); Secretary of the Army memorandum for the Chief of Engineers, dated March 11, 1975)

[33 FR 18670, Dec. 18, 1968, as amended at 40 FR 17023, Apr. 16, 1975]

CROSS REFERENCE: For regulations of the Federal Energy Regulatory Commission, see 18 CFR chapter I.

**§ 209.141 Coordination of hydroelectric power operations with power marketing agencies.**

(a) *Purpose.* This regulation establishes policies and procedures for coordinating the operation of the Corps of Engineers' hydroelectric generating facilities with the power marketing agencies.

(b) *Applicability.* This regulation applies to all civil works field operating agencies (FOA) having generating facilities producing marketable electric power.

(c) *References.* (1) Section 5, Pub. L. 534, 78th Congress, Flood Control Act of 1944, December 22, 1944 (58 Stat. 889).

(2) Section 302, Pub. L. 95-91, 95th Congress, Department of Energy Organization Act, August 4, 1977 (91 Stat. 565).

(d) *Background.* Section 5 of the Act of December 22, 1944 (Pub. L. 534, 78th Congress), provides that electric power and energy generated at reservoir projects under the control of the Department of the Army and in the opinion of the Secretary of Army not required in the operation of such projects shall be delivered to the Secretary of

Interior for transmittal and disposal in a manner to encourage the most widespread use thereof at the lowest possible rates to consumers consistent with sound business principles. Section 302 of the Department of Energy Organization Act (Pub. L. 95-91) transfers all functions of the Secretary of Interior under section 5 of the 1944 Act to the Secretary of Energy together with all other functions of the Secretary of Interior, and officers and components of the Department of the Interior, with respect to the Southeastern Power Administration; the Southwestern Power Administration; the Alaska Power Administration; the Bonneville Power Administration; and the power marketing functions of the Bureau of Reclamation.

(e) *Policies.* (1) The Corps is responsible for operating the hydroelectric power projects and providing information affecting cost and availability of power to the power marketing agencies. Marketing the generated power declared excess to the needs of the projects and recovering Federal investment are the responsibilities of the power marketing agencies.

(2) All FOA Commanders will develop, in coordination with their respective power marketing agency, a system for exchanging operating information. The system will include general operating information and information on conditions that could substantially affect costs or power availability.

(f) *Delegation.* Responsibility for coordinating the exchange of information may be delegated to the District Engineer at the discretion of the Division Engineer.

(g) *Procedures—(1) Specific requirements—(i) Continuing.* Prompt written notification will be provided to the appropriate power marketing agency each time a change in power operations or conditions which could substantially affect costs or power availability is anticipated.

(ii) *Annual.* Annually, when no changes in power operations or costs are expected for the succeeding 12-month period, the marketing agency will be notified of that fact in writing.

(2) *FOA responsibility.* The FOA directly responsible for communicating

with the marketing agency will develop appropriate reporting procedures in coordination with that agency.

[43 FR 8258, Mar. 1, 1978]

**§ 209.155 Expenditure of Federal funds for work shoreward of harbor lines.**

(a) Section 5 of the River and Harbor Act of July 13, 1892 (27 Stat. 111; 33 U.S.C. 628), prohibits the expenditure of money appropriated for the improvement of rivers and harbors for dredging inside of harbor lines duly established.

(b) It is not the policy of the Department to expend Federal funds for the removal of wrecks or other obstructions shoreward of established harbor lines.

**§ 209.160 The California Debris Commission.**

Section 1 of the Act of Congress of March 1, 1893 (27 Stat. 507; 33 U.S.C. 661), created the California Debris Commission, consisting of three officers of the Corps of Engineers, to regulate under the supervision of the Chief of Engineers and direction of the Secretary of the Army, hydraulic mining in the territory drained by the Sacramento and San Joaquin River systems, California. Under section 9 of the act (27 Stat. 508; 33 U.S.C. 669), the individual proprietor or proprietors, or in case of a corporation, its manager or agent appointed for that purpose, owning mining ground in this territory which it is desired to work by the hydraulic process, must file with the Commission a verified petition, setting forth such facts as will comply with law and the rules prescribed by the Commission. The law contains detailed instructions with regard to facts required to be shown by the petitioner and the procedure to be followed by the Commission in issuing an order directing the methods and specifying the manner in which operations shall proceed. Full information on law and procedure can be obtained from the Secretary, California Debris Commission, 650 Capitol Mall, Sacramento, California 95814.

**§ 209.170 Violations of laws protecting navigable waters.**

(a) [Reserved]

(b) *Injuries to Government works.* Section 14 of the River and Harbor Act of March 3, 1899 (30 Stat. 1152; 33 U.S.C. 408), makes it unlawful for any person or persons to take possession of or make use of for any purpose, or build upon, alter, deface, destroy, move, injure, obstruct by fastening vessels thereto or otherwise, or in any manner whatever impair the usefulness of any sea wall, bulkhead, jetty, dike, levee, wharf, pier, or other work built by the United States, or any piece of plant, floating or otherwise, used in the construction of such work under the control of the United States, in whole or in part, for the preservation and improvement of any of its navigable waters or to prevent floods, or as boundary marks, tide gauges, surveying stations, buoys, or other established marks, nor remove for ballast or other purposes any stone or other material composing such works. (The Secretary of the Army may, on the recommendation of the Chief of Engineers, grant permission for the temporary occupation or use of any of the aforementioned public works when in his judgment such occupation or use will not be injurious to the public interest).

(c) *Injurious deposits.* (1) Section 13 of the River and Harbor Act of March 3, 1899 (30 Stat. 1152; 33 U.S.C. 407), makes it unlawful to throw, discharge, or deposit, or cause, suffer, or procure to be thrown, discharged, or deposited either from or out of any ship, barge, or other floating craft, or from the shore, wharf, manufacturing establishment, or mill, any refuse matter of any kind or description whatever other than that flowing from streets and sewers and passing therefrom in a liquid state, into any navigable water of the United States, or into any tributary of any navigable water from which the same shall float or be washed into such navigable water, or to deposit or cause, suffer, or procure to be deposited material of any kind in any place on the bank of any navigable water or on the bank of any tributary of any navigable water, where the same shall be liable to be washed into such navigable water, either by ordinary or high tides, or by storms or floods, or otherwise, whereby navigation shall or may be impeded or obstructed. Section 13 does not apply

to the operations in connection with the improvement of navigable waters or construction of public works considered necessary and proper by the United States officers supervising such improvement or public work.

(2) An Act of Congress approved June 29, 1888 (25 Stat. 209; 33 U.S.C. 441-451), as amended on August 28, 1958 (72 Stat. 970-971; 33 U.S.C. 441-451b) forbids the placing, discharging, or depositing of refuse, dirt, ashes, cinders, mud, sand, dredgings, sludge, acid, or any other matter of any kind, other than that flowing from streets, sewers, and passing therefrom in a liquid state, in the tidal waters of the harbors of New York, Hampton Roads, and Baltimore or its adjacent or tributary waters, within the limits which shall be prescribed by the Supervisor of the Harbor. The provisions of this act are enforced by the Supervisor under the direction of the Secretary of the Army.

(d) *Penalties for violations.* (1) Section 12 of the River and Harbor Act of March 3, 1899 (30 Stat. 1151; 33 U.S.C. 406), as amended, provides that every person and every corporation that shall violate any of the provisions of sections 9 and 10 shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine, imprisonment, or both, in the discretion of the court. The removal of any structures or parts of structures erected in violation of the provisions of the said sections may be enforced by the injunction of any district court exercising jurisdiction in any district in which such structures may exist, and proper proceedings to this end may be instituted under the direction of the Attorney General.

(2) Section 16 of the River and Harbor Act of March 3, 1899 (30 Stat. 1153; 33 U.S.C. 412), provides that every person and every corporation that shall violate, or that shall knowingly aid, abet, authorize or instigate a violation of the provisions of sections 13, 14 and 15, shall be guilty of a misdemeanor. On conviction thereof violators shall be punished by a fine, imprisonment, or both, in the discretion of the court. Any master, pilot, and engineer, or person or persons acting in such capacity, respectively, on board of any boat or vessel who shall knowingly engage in

towing any scow, boat, or vessel loaded with any material specified in section 13 to any point or place of deposit or discharge in any harbor or navigable water, elsewhere than within the limits defined and permitted by the Secretary of the Army, or who shall willfully injure or destroy any work of the United States contemplated in section 14, or who shall willfully obstruct the channel of any waterway in the manner contemplated in section 15, shall be deemed guilty of a violation of the Act. Upon conviction he shall be punished as provided in this section, and shall also have his license revoked or suspended for a term to be fixed by the judge before whom tried and convicted. Any boat, vessel, scow, raft, or other craft used or employed in violating any of the provisions of sections 13, 14, and 15 shall be liable for the pecuniary penalties specified in this section, and in addition for the amount of the damages done by said boat, vessel, scow, raft, or other craft. The latter sum shall be placed to the credit of the appropriation for the improvement of the harbor or waterway in which the damage occurred, and said boat, vessel, scow, raft, or other craft may be proceeded against summarily by way of libel in any district court of the United States having jurisdiction thereof.

(e) *Enforcement.* (1) Section 17 of the River and Harbor Act of March 3, 1899 (30 Stat. 1153; 33 U.S.C. 413) provides that the Department of Justice shall conduct the legal proceedings necessary to enforce the provisions of sections 9 to 16, inclusive, of the Act. It shall be the duty of district attorneys of the United States to prosecute vigorously all offenders against the same whenever requested to do so by the Secretary of the Army or by any of his designated representatives.

(2) Under the provisions of section 17, District Engineers and the United States collectors of customs and other revenue officers, have power and authority to swear out process and to arrest and take into custody, with or without process, any person or persons who may commit any of the acts or offenses prohibited by sections 9 to 16, inclusive, or who may violate any of the provisions of the same. No person shall

be arrested without process for any offense not committed in the presence of some one of the aforesaid officials. Whenever any arrest is made under the provisions of the Act, the person so arrested shall be brought forthwith before a commissioner, judge, or court of the United States for examination of the offenses alleged against him. Such commissioner, judge, or court shall proceed as authorized by law in case of crimes against the United States.

(3) It is the duty of each District Engineer to take notice of any violations of the laws for the protection of the navigable waters and the works of improvement therein that may occur in his district and to take the necessary steps to secure enforcement of the law. Whenever any violation of any of these provisions of law comes to his attention he will investigate carefully the circumstances of the case and will determine the amount of the damage for which the parties committing the violation are responsible under section 16 of the River and Harbor Act of March 3, 1899. He will advise the responsible parties to remove the illegal structure or deposit or to repair the damage at their own expense within a time specified by him. When there is reasonable doubt as to legal liability or the facts do not appear to warrant legal action, the District Engineer will report the case to the Chief of Engineers for decision before communicating with the responsible parties. When the damage must be repaired within a reasonable time, if the responsible parties so request in writing and if, when considered advisable by the District Engineer to protect the interests of the United States, they furnish a satisfactory bond or other guaranty, he may cause the repairs to be made by employees of the United States and then call upon the responsible parties to pay over to him the cost of the damages when finally ascertained. Where the damage is not to be repaired within a reasonable time, the District Engineer will make final settlement with the responsible parties as promptly as possible by collecting the estimated amount of the damages. All sums so received will be deposited promptly to the credit of the Treasurer of the United States for re-credit to the appropriation affected and

will be accounted for in the District Engineer's money accounts by proper vouchers. With reference to the method of ascertaining the amount of the damages under section 16 of the Act, a distinction should be made between cases involving property that should be repaired and those involving property that should be abandoned. In the former cases the amount of the damages should be the total cost of repairs, less any salvage value and any enhanced value. In the latter cases, the amount of the damages should be the fair value of the property, less any salvage value. Whether or not there has been any enhanced value (i.e., whether the fair value of the structure immediately after the repairs is greater than its fair value immediately before the damage occurred) is a matter to be determined from an actual survey of the structure and knowledge of its age and condition. Where maintenance has equalled depreciation there probably would be no enhanced value.

(4) If the parties deny their responsibility, or if they refuse or neglect to remove any unlawful structure or deposit or to repair the damages within the time specified by the District Engineer, the matter will be reported to the Chief of Engineers with such evidence as the District Engineer may be able to obtain and his recommended action under section 17 of the Act of March 3, 1899. In a situation requiring immediate action, the District Engineer may report the case directly to the U.S. attorney for the district. The Chief of Engineers will be advised of such action by a written report. Although the Corps of Engineers has certain police powers under this Act it has been the long standing policy to secure compliance with its provisions short of legal proceedings. Accordingly every effort will be made to accomplish corrective measures prior to initiation of action leading to such proceedings. As a general rule, while minor and unintentional or accidental violations of the provisions of the Act need not be reported to the Chief of Engineers, all willful or intentional violations and all cases in which the parties responsible refuse or neglect to remove the unlawful structure or deposit or to make

good the damages suffered should be reported promptly to the Chief of Engineers in accordance with the above. It is the policy not to recommend prosecution when the violation of law is trivial, apparently unpremeditated, and results in no material public injury. Each report recommending prosecution should be accompanied by a full statement of the case and copies of correspondence relating thereto.

(5) The procedure in cases involving injurious deposits is similar to that described for other violations of law except that as the damage caused thereby cannot be repaired readily there will be no reason for serving any notice on the parties responsible for the violations further than to bring to their attention the consequences thereof.

(6) Section 6 of the river and Harbor Act approved March 3, 1905 (33 Stat. 1148; 33 U.S.C. 417) provides that expenses incurred by the Corps of Engineers in all investigations, inspections, hearings, reports, service of notice, or other action incidental to examinations into alleged violations of laws for protection and preservation of navigable waters shall be payable from any funds which may be available for the improvement, maintenance, operation, or care of the waterways or harbors affected. If such funds are not available in sums judged by the Chief of Engineers to be adequate, they shall be payable from any funds available for examinations, surveys, and contingencies of rivers and harbors.

[33 FR 18670, Dec. 18, 1968, as amended at 36 FR 17855, Sept. 4, 1971; 51 FR 45765, Dec. 22, 1986; 53 FR 27512, July 21, 1988]

**§ 209.180 Temporary closure of waterway to navigation.**

(a) When an application is received for the temporary closure of a waterway for the construction of a structure or the performance of other work in the waterway, the District Engineer will assure himself of the necessity for the closure and arrange after informal communication with any important navigation interests concerned the time and duration of the closure which will enable the operations to be completed with the least interference with navigation. If there is no question as to the necessity and propriety of the clo-

sure, the District Engineer is authorized to inform the applicant as follows: "The Department of the Army will interpose no objection to the closure for a stated period beginning at a specified date: *Provided*, That prior thereto the applicant will notify navigation interests by an advertisement in the press or otherwise as the District Engineer may approve and on the understanding that the waiver of objection does not affect the liability of the applicant for any damages that may arise by reason of the closure." The letter to the applicant will be signed "By Authority of the Secretary of the Army" and distribution made as prescribed for permits.

(b) District Engineers will give careful consideration to the effect of any closure on through navigation. Should coordination with other districts be necessary the case will be forwarded to the Division Engineer for such coordination.

(c) Cases not falling within the authority above conferred will be forwarded to the Chief of Engineers with the recommendations of the Division and District Engineers.

**§ 209.190 [Reserved]**

**§ 209.200 Regulations governing navigable waters.**

(a) *Publication of regulations.* (1) Regulations prescribed by or under the direction of the Secretary of the Army to govern navigation and navigable waters, are contained in the Code of Federal Regulations, title 33, Navigation and Navigable Waters, Chapter II.

(2) District engineers (or division engineers if considered preferable by the latter to avoid duplication in cases where the regulations involved apply to more than one district) will distribute copies of departmental regulations to all known interested parties as soon as their publication has been noted in the FEDERAL REGISTER. In the case of regulations applicable to more than one division, distribution will be handled as agreed upon by the division engineers concerned. Under the Administrative Procedure Act (5 U.S.C. 551-553), publication in the FEDERAL REGISTER shall be not less than 30 days prior to the effective date except as

otherwise provided upon good cause found and published with the regulations.

(b) *Navigation regulations.* (1) Section 7 of the River and Harbor Act approved August 8, 1917 (40 Stat. 266; 33 U.S.C. 1) authorizes the Secretary of the Army to prescribe such regulations for the use, administration, and navigation of the navigable waters of the United States as public necessity may require for the protection of life and property, or for operations of the United States in channel improvement, covering all matters not specifically delegated by law to some other executive department. The statute provides for the posting of regulations and punishment for violations.

(2) Section 6 of the River and Harbor Act approved June 13, 1902 (32 Stat. 374; 33 U.S.C. 499) provides that regulations prescribed by the Secretary of the Army may be enforced as provided in section 17 of the River and Harbor Act approved March 3, 1899 (30 Stat. 1153; 33 U.S.C. 413).

(3) District Engineers will take action with respect to regulations prescribed for waterways under their jurisdiction:

(i) To insure that the regulations are brought to the attention of the public.

(ii) To insure that the regulations are properly and fairly administered.

(iii) To recommend any revisions necessary to permit full use of the waterway by the public.

(c) *Danger zones.* (1) The Secretary of the Army has authority to prescribe regulations for the use and navigation of any area of the navigable waters of the United States or waters under the jurisdiction of the United States likely to be endangered by Department of Defense operations. This authority is pursuant to the provisions of Chapter XIX of the Army Act of July 9, 1918, or of section 7 of the River and Harbor Act of August 8, 1917.

(2) On receipt of a request from any element of the Department of Defense or other agency for approval by the Secretary of the Army of regulations establishing danger zones under authority of either Act, the District Engineer will, prior to issuing any public notice, make certain that the applicant: (i) Has coordinated its proposed

operations with any operations being conducted or contemplated by other agencies in the same area with a view to avoiding interagency conflicts, (ii) has obtained clearance from the proper Regional Subcommittee on Airspace, Rules of the Air and Air Traffic Control (Air Coordinating Committee), where the use of airspace is involved, and (iii) has conducted preliminary discussions with local interests when considered advisable. In the case of proposed danger zones off the Atlantic and Pacific Coasts, the coordination referred to in (c)(2)(i) of this section will include the Commander, Service Force, U.S. Atlantic Fleet, or the Commander, Western Sea Frontier.

(3) The authority to prescribe danger zone regulations must be exercised so as not to interfere with or restrict unreasonably the food fishing industry. Whenever the establishment of a proposed danger zone or restricted area may affect fishing operations the District Engineer will consult with the regional director, U.S. Fish and Wildlife Service, Department of the Interior. Two copies of all notices of applications for the establishment of danger zones and restricted areas will be forwarded to the Chief of Staff, U.S. Air Force. In addition, notices of all applications relating to the establishment of aerial gunnery and bombing areas will be sent to local Army, Navy, and Federal Aviation Agency representatives.

(4) If the use of water areas is desired only for such temporary, occasional, or intermittent periods that operations can be conducted safely without imposing restrictions on navigation, applicants may be informed that formal regulations by the Secretary of the Army are not required. However, proper notices for mariners requesting that vessels avoid the areas will be issued by the District Engineer to all interested persons. Copies will be sent to the Commandant, U.S. Coast Guard, Washington, D.C. 20226 and the Commander, U.S. Naval Oceanographic Office, Washington, D.C. 20390.

(d) *Dumping grounds.* (1) Section 4 of the River and Harbor Act of March 3, 1905 (33 Stat. 1147; 33 U.S.C. 419), authorizes the Secretary of the Army to prescribe regulations to govern the

transportation and dumping into any navigable water, or waters adjacent thereto, of dredgings and other refuse materials whenever in his judgment such regulations are required in the interest of navigation.

(2) Section 13 of the river and Harbor Act of March 3, 1899 (30 Stat. 1152; 33 U.S.C. 407) authorizes the Secretary of the Army to permit the deposit of refuse matter in navigable waters, whenever in the judgment of the Chief of Engineers anchorage and navigation will not be injured thereby, within limits to be defined and under conditions to be prescribed by him. Although the Department has exercised this authority from time to time, it is considered preferable to act under Section 4 of the River and Harbor Act of March 3, 1905 (33 Stat. 1147; 33 U.S.C. 419). As a means of assisting the Chief of Engineers in determining the effect on anchorage of vessels, the views of the U.S. Coast Guard will be solicited by coordination with the Commander of the local Coast Guard District.

(3) Under the authority contained in an Act of Congress to prevent obstructive and injurious deposits within the harbor and adjacent waters of New York City of June 29, 1888 (25 Stat. 209; 33 U.S.C. 441), the Supervisor of New York Harbor has established dumping areas in those waters and has prescribed regulations for their use. The provisions of the act are enforced by the Supervisor under the direction of the Secretary of the Army.

(4) In considering requests for the establishment of dumping grounds, District and Division Engineers will give careful consideration to the requirements of navigation and will take action to prevent unreasonable injury to fish and wildlife.

(e) *Public notice and consultation with interested parties.* (1) When applications are received for the promulgation of regulations as outlined in paragraphs (b) through (f), inclusive, of this section, District Engineers will issue public notices to all parties deemed likely to be interested and specifically to the agencies referred to in these paragraphs. The notice should fix a limiting date within which comments will be received, normally a period not less than 30 days after the actual mailing of the

notice. If time is an essential element when adequately explained by the applicant, the District Engineer is authorized to give interested parties a minimum of 10 days after receipt of the notice in which to present protests. A copy of every notice issued will be sent to the Chief of Engineers, Attention: ENG CW-ON.

(2) Copies of the notices sent to interested parties, together with a list of parties to whom sent, will accompany reports on all applications for promulgation of regulations submitted to the Chief of Engineers for necessary action.

(3) In all instances when response to a public notice has been received from a Member of Congress, the District Engineer will inform the Member of Congress of the final action taken on the application.

(f) *Public hearings.* (1) It is the policy of the Chief of Engineers to conduct his civil works activities in an atmosphere of public understanding, trust, and mutual cooperation and in a manner responsive to public needs and desires. To this end, public hearings are helpful and will be held whenever there appears to be sufficient public interest to justify such action. In case of doubt, a public hearing should be held.

(2) Among the instances warranting public hearings are general public opposition to the promulgation of regulations governing the use and navigation of navigable waters. District Engineers will notify the Division Engineer of the need for a hearing, state the proposed arrangements therefor and obtain his concurrence therein. Public hearings will be held in any case when Congressional interests or responsible local authorities make an official and valid request therefor and such action will fulfill the above-stated policy and objectives.

[33 FR 18670, Dec. 18, 1968, as amended at 51 FR 45765, Dec. 22, 1986; 52 FR 24157, June 29, 1987]

#### § 209.220 Flood control regulations.

(a) *Local protection works.* On projects authorized subject to specified conditions of local cooperation, no construction is undertaken by the Department of the Army until satisfactory assurances of the required local cooperation have been accepted by the Secretary of

the Army and until any lands, easements, and rights-of-way required to be furnished by local interests have been made available for at least a complete unit of the project. The District Engineers notify local interests concerned of the requirements of local cooperation and request assurances by registered mail prior to the preparation of final plans and specifications. Regulations prescribed by the Secretary of the Army for the maintenance and operation of local flood protection works are contained in § 208.10 of this chapter. When assurances satisfactory to the District Engineer are received, they are forwarded through the Division Engineer to the Chief of Engineers for consideration of the Secretary of the Army. The District Engineers advise local interests of the action taken by the Department. Completed projects or completed useful units thereof are normally turned over to local interests for maintenance and operation as soon as the construction and testing of equipment is completed and the project is in proper condition for the assumption of maintenance and operation by local interests. The transfer is accomplished by formal notice from the District Engineer to the local interests that the completed facilities are being turned over to them for maintenance and operation as of a specific date. During construction, District Engineers keep the local interests concerned advised as to the probable date of transfer.

(b) *Use of storage allocated for flood control or navigation at reservoirs constructed wholly or in part with Federal funds.* Regulations prescribed by the Secretary of the Army in accordance with section 7 of the Flood Control Act of December 22, 1944 (58 Stat. 890; 33 U.S.C. 709) are for the purpose of coordinating the operation of the flood control features of reservoirs constructed wholly or in part with Federal funds and other flood control improvements to obtain the maximum protection from floods which can reasonably be obtained with the proper operation of all flood control improvements. Proposed regulations are determined by the District Engineer in cooperation with the persons responsible for the maintenance and operation of the reservoir involved after a detailed study

of the flood problems and the characteristics of the reservoir project. The proposed regulations are forwarded by the District Engineer through the Division Engineer to the Chief of Engineers for consideration of the Secretary of the Army. When approved by the Secretary of the Army, these regulations are published in part 208 of this chapter.

**§ 209.230 Use of reservoir areas for recreation.**

The Department of the Army in accordance with Section 4 of the Flood Control Act of December 22, 1944, as amended by section 4 of the Flood Control Act of July 24, 1946 (60 Stat. 641) prepares and administers plans to obtain the maximum sustained public benefit from the use of reservoir areas under its control for recreation and other related purposes, when such use is consistent with the operation and maintenance of the reservoir project for the specific purposes of the reservoir project as authorized by law and when such use is determined not to be contrary to the public interest. The plans are prepared and administered by the District Engineers, subject to review and approval of the Division Engineers and the Chief of Engineers, in close cooperation with other Federal agencies and local interests. The views and desires of these agencies and local interests are obtained normally by conferences with the District Engineers. In many cases, public hearings are held by the District Engineers at appropriate times in the vicinity of the reservoir area at which time anyone can express his views relative to these plans for consideration of the Department of the Army. Rules and regulations are prescribed by the Secretary of the Army to govern the public use of the reservoir areas in accordance with the law as a part of the master plan for recreational and related uses of the reservoir area. These rules and regulations are published in 36 CFR parts 311 to 326. Licenses and leases are granted under the law containing conditions and provisions to govern the use of specific portions of the reservoir area. Full information concerning such matters may be obtained from the District Engineer in charge of the reservoir.

## § 209.300

### § 209.300 Flood control regulations.

(a) Regulations for the operation and maintenance of local flood protection works approved by the Secretary of the Army under the authority contained in Section 3 of the Flood Control Act of June 22, 1936, as amended and supplemented, are codified as §208.10 of this chapter. These regulations cover conditions normally and regularly required. Whenever the regulations are not sufficiently broad to cover the specific maintenance and operation requirements of a particular project, District Engineers will submit through the Division Engineers recommended additional regulations needed for that particular project. Such supplemental regulations will require approval of the Secretary of the Army and will be made applicable only to the individual project concerned. Local interests will be advised of the approved regulations for operation and maintenance of local flood protection works at the time assurances of local cooperation are requested. District Engineers will keep informed as to the extent of compliance with approved regulations for operation and maintenance through regular, periodic inspection of the projects concerned and through careful analysis of the semiannual reports which the operating and maintaining agencies are required to submit in accordance with the regulations. The District Engineer's views as to any measures required to conform to the approved regulations will be furnished to the agencies responsible. In any case where the District Engineer has been unable to arrange satisfactory compliance or where there is question or disagreement as to the measures required for compliance, a report of the circumstances, together with the recommendations of the District and Division Engineers, will be submitted to the Chief of Engineers for consideration.

(b) Regulations for the use of storage allocated for flood control or navigation at reservoirs constructed wholly or in part with Federal funds provided on the basis of such purposes, are contained in §208.16 et seq. of this chapter.

## 33 CFR Ch. II (7-1-01 Edition)

### § 209.310 Representation of submarine cables and pipelines on nautical charts.

(a) The policy of the Corps of Engineers with respect to showing the locations of submarine cables and pipelines on nautical charts published by the Corps of Engineers is as follows:

(1) Within protected waters such as harbors, rivers, bays, estuaries or other inland waterways the location of submarine cables and pipelines is to be indicated by shaded areas marked "Pipeline area" or "Cable area". The extent of the limits of the area will be governed by local conditions but shall include the immediate area which overlies the cable or pipeline.

(2) Ordinarily, the shaded area on a chart which depicts a cable area or pipeline area should not exceed 500 feet on each side of the location of the cable or pipeline except on small scale charts where an area of that width would not be of sufficient prominence.

(3) The shaded area will be designated "cable area" or "pipeline area" as appropriate, but no other information as to the character or ownership of the installation will appear on the chart.

(b) District engineers will furnish copies of all permits issued for submarine cable and pipelines to the National Oceanic and Atmospheric Administration (NOAA), National Ocean Service, ATTN: N/CG222, Rockville, MD 20852, with his/her recommendation of whether or not the installation should be shown on NOAA nautical charts. National Ocean Service must be notified of the commencement and completion dates for all permitted activities under this section. (Note: Decisions to publish these cables and pipelines on NOAA nautical charts lie solely within NOAA's discretion.)

[51 FR 45765, Dec. 22, 1986]

### § 209.315 Public access to navigation works.

While the regulations prescribed by the Secretary of the Army for various navigation improvements usually strictly prohibit trespass on Government property, those regulations will not be construed as prohibiting access to navigation works of general public interest subject to the following criteria:

(a) The public will not be permitted in areas where their presence would subject themselves or Government operating personnel to serious accident hazards.

(b) The public will not be permitted in areas where their presence would interfere with any phases of navigation operations.

(c) The public will be given access to all areas other than those specified under paragraphs (a) and (b) of this section, subject only to the normal legal requirements with respect to property and personal rights.

**§ 209.320 Policy on release of commercial statistics.**

The collection of commercial statistics pertaining to rivers, harbors, and waterways, and annual reports thereof to Congress, are required by the River and Harbor Act of June 23, 1866 (14 Stat. 70), the act of February 21, 1891 (26 Stat. 766), the River and Harbor Act of June 13, 1902 (32 Stat. 376), the River and Harbor Act of July 25, 1912 (37 Stat. 201), the River and Harbor Act of September 22, 1922 (42 Stat. 1043), and Pub. L. No. 16, February 10, 1932 (47 Stat. 42). It is the policy of the Department to hold in strict confidence any data or information which has been furnished by shippers and others upon the understanding that it will not be disclosed and will only be used in the compilation of port or waterway statistics. In case Federal or State agencies or local interests request other than general information made permissible hereunder, their attention will be called to the policy indicated in this section.

**§ 209.325 Navigation lights, aids to navigation, navigation charts, and related data policy, practices and procedure.**

(a) *Purpose.* This regulation prescribes the policy, practice and procedure to be used by all Corps of Engineers installations and activities in connection with aids to navigation, chart data, and publication of information on Civil Works activities.

(b) This regulation will be applied by all elements of the Corps of Engineers with Civil Works responsibilities.

(c) *Reference.* Public Law 85-480, Publication Authority (72 Stat. 279).

(d) *Cooperation with Coast Guard.* (1) District Engineers will consult with the Coast Guard District Commander during design of channel and harbor improvement projects to discuss the aids to navigation requirements and all other facets of the projects that involve Coast Guard responsibility. Project material furnished direct to Coast Guard Commanders will include:

(i) Information as to the authorization by Congress of a project involving changes affecting aids, such as channel limits, breakwaters, including a copy of the project document;

(ii) The proposed operations on such projects during the next fiscal year, to be furnished annually on the release of the budget estimates;

(iii) Plans showing the final location of the channel limits or structures to be furnished at the time work is undertaken.

(2) Changes in channel limits affecting navigation aids, made under general or specific provisions of the law, should be made the subject of a conference with the Coast Guard District Commander. He will be promptly informed as to the approval of such changes and the probable date of completion of the work.

(3) District Engineers will furnish direct to the various Coast Guard District Commanders, for their immediate information, any facts which may come to their attention in connection with their duties which will be of benefit to the Coast Guard in maintaining its system of aids to navigation. This should include statements as to the displacement of or defects in any such aids to navigation.

(4) If work involving harbor or channel improvements directly affects any existing aids to navigation or any structures of the Coast Guard, Districts Engineers will, when practicable, give notice to the Coast Guard District Commander sufficiently in advance to permit taking such steps as may be deemed necessary by the Coast Guard. If the Coast Guard District Commander specifically requests that the affected structure be replaced, the District Engineer will inform him of the estimated cost and will proceed with the work if so authorized by the Chief of Engineers. On completion of the work, the

District Engineer will promptly furnish the Coast Guard District Commander, for settlement, an account of the expense incurred.

(e) *Navigation Aids of the Corps of Engineers.* (1) Whenever channel dredging or other channel improvements are being performed, necessary temporary markers, such as ranges and light poles, should be installed and maintained by the District Engineer pending the installation of permanent aids by the Coast Guard. The Coast Guard desires that information regarding aids to navigation installed or maintained by District Engineers in connection with harbor or channel improvement be furnished promptly. Such information is needed for inclusion in Notice to Mariners as published by the Coast Guard, and where desirable on the charts of the waters concerned.

(2) District Engineers will notify the Coast Guard District Commander in every case where aids to navigation for marking works of harbor or channel improvements are established or discontinued. Notice should be given of such aids as may be of use or interest to general navigation. Notice need not be given as to such buoys, lights, or fog signals as are of temporary or unimportant character, or of importance only to the Corps of Engineers. Omit also lights or fog signals on ferry slips and on piers used only by certain vessels, and stakes, bushes, and barrel buoys marking shallow and little-used channels.

(3) In placing aids to navigation in connection with harbor or channel improvement works, District Engineers should see that they do not conflict in character or otherwise with other aids to navigation in the vicinity. District Engineers should confer with the Coast Guard District Commander on this subject.

(4) The necessary blank forms for reporting information regarding Corps of Engineers aids will be furnished upon request by the Coast Guard District Commander.

(5) It is essential that the Coast Guard be furnished with information for publication concerning markers installed by the Corps of Engineers as temporary aids to navigation, for new

improvements, in advance of permanent aids, and also concerning other markers that may be established in connection with Corps of Engineers operations that may also serve as important aids to navigation. Care will be exercised to see that all markers established are not misleading to general navigation and do not interfere with aids to navigation established by the Coast Guard.

(f) *Colors of dredging buoys established by Corps of Engineers.* (1) In order to distinguish buoys placed and maintained by the Corps of Engineers for dredging purposes from aids to navigation placed by the Coast Guard, Corps buoys will be painted white with the top 2 feet painted light green.

(2) If buoys with special markings are needed to indicate the different sides of the navigable channel, prior arrangements will be made with the Coast Guard District Commander having jurisdiction.

(g) *Information to be furnished by the Corps of Engineers.* (1) District Engineers responsible for harbors and waterways shown on charts of the National Ocean Survey (NOAA), will report the channel conditions promptly, using standard tabular forms, to:

Director, Defense Mapping Agency, ATTN: Hydrographic Center, Washington, D.C. 20390.

National Oceanic and Atmospheric Administration, ATTN: National Ocean Survey C-32, Rockville, Md. 20852.

Commandant and District Commanders, U.S. Coast Guard.

(2) Channel survey drawings furnished to the Coast Guard are to include:

(i) Either NAD 27 or State Plane grids.

(ii) Plots of the positions of aids to navigation.

(iii) Written notations of the coordinates in NAD 27 or State Plane Coordinates of the fixed aids to navigation found during the survey.

(3) The standard tabular forms with illustrated data follow:

(i) For channels 400 feet wide and greater (ENG Form 4020-R).

(ii) For channels 100 to 400 feet wide (ENG Form 4021-R).

[ \_\_\_\_\_ 11-11-88-# \_\_\_\_\_ (State)]

Name of channel	Date survey	Project			Minimum depths in channel entering from seaward		
		Feet width	Miles length	Feet depth	Left outside quarter feet	Mid-channel for half project width feet	Right outside quarter feet
Kings Island Channel .....	3-78	300	1.14	26	24	23	26
Whitehall Channel .....	3-78	200	1.81	26	27	26	25

ENG FORM 4021-R (Jul 59)

(iii) For channels less than 100 feet in width, report controlling depths only based on at least 80 percent of project width, 40 percent on either side of centerline. (The submission of tabular forms is not required for channels having a project depth less than 10 feet except coastal inlets and harbors of refuge.)

(4) The tabulations of depths should be amplified by footnotes or otherwise to show clearly and definitely the location of controlling shoals, tendency of shoals to recur, and all other critical information of special value and importance for safe navigation of the channel. Reaches of channel not presently named should be identified in the tabular form by reference to chartered aids or features, or assigned identifying names, numbers or letters. For localized irregular project areas where the application of the tabular form would not be practical, the controlling depth based on a safe navigable width will be described as well as unusual or critical conditions of shoaling.

(5) The prompt dissemination of the latest detailed information concerning channel conditions is of utmost importance, and necessary measures will be taken to insure that such information is reported without delay simultaneously to the U.S. Naval Oceanographic Office, the Coast Guard, the National Ocean Survey and Defense Mapping Agency. When a dangerous shoaling is found during the progress of a survey, information thereon will be furnished immediately to the above-mentioned agencies, so that such information may be made available to mariners promptly, and buoys shifted to mark the shoal. Descriptions of any dredging or other operations in impor-

tant channels in tidal waters—either in progress and not already reported, or soon to be undertaken—together with a statement of the work and expected duration, will also be reported in order that Naval and other vessels may be warned to look out for dredges and other plant, temporary markers and lights.

(6) District Engineers having charge of improvements of harbors and waterways shown on charts of the Defense Mapping Agency or of the National Ocean Survey will send to both offices promptly, as ascertained for the correction of such charts, the following information: Descriptions of changes in channel location and depth, or of obstructions that may be discovered, with such prints and other information as may be necessary to permit the existing charts to be corrected to date. All maps should contain sufficient data to permit the fixed plane or reference, bench marks, base lines, etc., to be determined and located. The survey stations should be shown and, when no unreasonable expenditure of time or labor is involved, the map will show one or more triangulation station(s) of the National Ocean Survey in such a way as to facilitate connection of old or new work. The source of authority for the shoreline and topography should be stated on the map. The data supplied should indicate what charts are affected.

(7) When any survey of areas covered by charts of the Defense Mapping Agency or the National Ocean Survey is completed, a print of each tracing will be sent direct to both the Defense Mapping Agency and the National Ocean Survey. It is not necessary that tracings be fully complete as to form

and title when such prints are made. An informal manuscript title marked "Advance Sheets", and containing a description sufficient to identify the locality and to identify the source of the map, will be sufficient.

(8) Information relative to the improvement of harbors and waterways such as dredging operations, and precautions rendered necessary due to the presence of dredging or other plant will, when considered necessary, be brought to the attention of vessel owners or operators regularly using the waterway. This will be done through issuing bulletins or notices by District Engineers.

(h) *Special Reports.* Changes affecting navigation will be made promptly whenever information of immediate concern to navigation becomes known. Items of information especially desired are channel conditions as revealed by surveys, changes in channel conditions, either by natural causes or by dredging or other work, changes in approved projects for improvement with statements of results expected from proposed operations, descriptions of proposed dredging or other Federal work of improvement such as breakwater, pier, and revetment construction or alterations, descriptions of proposed or completed municipal or private improvements in or affecting navigable waters. Additional items of information desired are descriptions of wrecks, uncharted shoals, and other obstructions to navigation and particulars as to proposed or completed removal of same, changes in buoys or lights, erection of new, or changes in existing bridges, new or revised Federal or local rules and regulations for harbors and channels, and establishment or existence of danger areas in navigable waters. Reproductions of drawings or sketches which will be helpful in interpreting the data shall accompany the reports. The reports will not be limited to a reference to an accompanying drawing or sketch, but will contain a complete description in form suitable for publication in notices to mariners and the monthly supplements to the U.S. Coast Pilot. In this respect, the reports will provide enough information that a single notification to navigational interests will suffice. In the

case of dredging or construction work, the bare statement that work will commence or has commenced on a certain date is insufficient. All additional information possible, such as probable duration of operations and object of work, will be given—the latter in the case of dredging being such data as the area to be covered and the depth expected to be provided. The reports required by this paragraph will be identified by reference to the appropriate Engineer Manual or regulation and will be numbered consecutively by each District during the calendar year, starting with number 1 at the beginning of each year.

(i) *Information pamphlets, maps, brochures and other material.* (1) Pub. L. 85-480, approved 2 July 1958, authorizes the Chief of Engineers to publish information pamphlets, maps, brochures, and other material on river and harbor, flood control, and other Civil Works activities, including related public park and recreation facilities under his jurisdiction, as he may deem to be of value to the general public.

(2) This Public Law authorizes the Chief of Engineers to provide for the sale of any of the material prepared under authority of the act—and of publications, charts, or other material prepared under his direction pursuant to other legislative authorization or appropriation, and to charge therefor a sum of not less than the cost of reproduction.

(3) District Engineers are authorized to publish the material covered in paragraph 8a above, and to sell such material. Except for material specifically prepared for free distribution to the general public, the charges for such other published information will be not less than the cost of its reproduction.

(4) Condition survey maps or charts, sold or otherwise distributed to the public, showing depths will specifically state the date or dates that the surveys were made. They shall also have the following notation printed or stamped thereon:

"The information depicted on this map represents the results of surveys made on the dates indicated and can only be considered as indicating the

general conditions existing at that time.”

[43 FR 19661, May 8, 1978]

#### § 209.335 Publication.

(a) Section 4 of the Administrative Procedure Act requires publication of general notice of proposed rule making in the FEDERAL REGISTER (unless all persons subject thereto are named and either personally served or otherwise have actual notice thereof in accordance with law), except to the extent that there is involved: (1) Any military, naval, or foreign affairs function of the United States or (2) any matter relating to agency management or personnel or to public property, loans, grants, benefits, or contracts. Except where notice of hearing is required by statute, this requirement does not apply to interpretative rules, general statements of policy, rules of agency organization, procedure, or practice, or in any situation in which the agency for good cause finds (and incorporates the finding and a brief statement of the reasons therefor in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest.

(b) General notice of proposed rule making published in accordance with the above will include: (1) A statement of the time, place, and nature of public rule making proceedings; (2) reference to the authority under which the rule is proposed; and (3) either the terms or substance of the proposed rule or a description of the subjects and issues involved.

#### § 209.340 Laboratory investigations and materials testing.

(a) *Purpose.* The purpose of this section is to define and establish policies and procedures applicable to the performance of investigations and tests at Corps of Engineers laboratory installations for other governmental agencies and private organizations.

(b) *Applicability.* This regulation applies to Corps of Engineers Divisions and Districts operating soils, concrete, water quality and hydraulic laboratories, and to the Inter-Agency Sedimentation Project.

(c) *References.* (1) AR 37-20.

(2) AR 37-27.

(3) ER 1-1-6.

(4) ER 10-1-3, Appendix XIII.

(5) ER 1110-1-8100.

(6) ER 1140-2-303.

(d) *Policy.* Subject to the authority limitations contained in paragraph (f) of this section, laboratory investigations and materials testing may be performed for other agencies of the Federal Government, State and local units of government, foreign governments and private firms under the following conditions:

(1) The work will be performed on a cost reimbursable basis.

(2) Work may be performed for State and local units of government, foreign governments or private firms only when it is firmly established that private commercial laboratory facilities capable of performing such work are not available, or because of location or for other reasons it is clearly impractical to utilize such private commercial laboratory services. The requesting entity must further certify that such services cannot be procured reasonably and expeditiously through ordinary business channels.

(3) Performance of the work will not interfere with provisions of services essential to the mission of the Corps.

(4) Performance of the work will not require an increase in the permanent staff of the facility.

(5) Performance of the work will not require expansion of normal facilities.

(6) The work is within the scope of authorized activities of the laboratory at which the work is to be performed.

(7) Performance of the work will not be adverse to the public interest.

(8) Prior to undertaking laboratory investigations or materials testing for private firms, written certification will be obtained from such firms stating that the results of the work will not be used in litigation or for promotional purposes.

(e) *Terms of providing reimbursement for work performed—*(1) *Federal agencies.* Reimbursement for work for the Department of Defense, the Department of the Army, and other Federal Agencies will be in accordance with the procedures prescribed in AR 37-27.

(2) *State and local units of Government.* Funds to cover the total estimated cost of the work or an initial increment of

the estimated cost based on an approved schedule of payment will be deposited with the installation performing the work before any obligations or expenses in connection with the work are incurred; and when funds are being deposited on an approved schedule no obligations or expenses will be incurred in connection with the work in excess of funds on deposit.

(3) *Private concerns and foreign governments.* Funds will be deposited in advance of the work as required in paragraph (e)(2) of this section. Charges shall include a surcharge of 15 percent of all applicable costs, except under the following conditions.

(i) When the final product will directly contribute to a specific planning, design, or construction activity which derives its principal support from Federal funds in the form of a grant or otherwise.

(ii) Where an exception is granted based on a direct benefit to the Government. Adequate justification, outlining the direct benefits which are expected to accrue to the Government, will be forwarded to HQDA (DAEN-CWE-DC) Washington, DC 20314, for review and approval prior to deletion of the surcharge.

(f) *Authority.* The following delegations of authority to perform laboratory investigations and materials testing apply.

(1) *Division materials laboratories.* Division Engineers are delegated the authority to approve laboratory work for Federal, State and local units of government when the total estimated cost of each investigation or test project is \$15,000 or less. Division Engineers are also delegated the authority to approve laboratory work for private firms and foreign Governments when the total estimated cost of each investigation or test project is \$5,000 or less. Approval is required when the estimated or actual costs exceed those delegations of authority. Requests for approval shall be addressed to DAEN-CWE-DC.

(2) *Hydraulic laboratories.* Division Engineers and District Engineers operating hydraulic laboratories or hydraulic model laboratories are delegated the authority to approve laboratory work for others within the same limitations and in accordance with the

same procedures as apply to Division Materials Laboratories.

(3) *Inter-Agency Sedimentation Project, St. Anthony Falls Laboratory, University of Minnesota, Minneapolis, Minnesota.* The District Engineer, St. Paul is authorized to perform work required in procurement, testing and calibration of specialized sediment sampling equipment developed at the Inter-Agency Sedimentation Project. Equipment of this nature will be made available to Federal, State and local governmental agencies at cost. The District Engineer, St. Paul, is also authorized to approve the performance of testing and calibration work for U.S. private firms that fabricate this specialized equipment for commercial sale when the estimated cost for services of Corps personnel is \$5,000 or less for a single order. Approval is required when the estimated single order cost for a private firm exceeds \$5,000 and when the total cost of work during a fiscal year for any one private firm exceeds \$15,000. Requests for approval shall be addressed to HQDA (DAEN-CWE-HY) Washington, DC 20314.

(g) *Reports of testing results.* Final reports of results will be submitted in accordance with instructions provided by the sponsoring organization, with two copies to HDQA (DAEN-CWE-DC) Washington, DC 20314.

Copies of reports of scientific or technical activities will be transmitted to the Defense Documentation Center as required by AR 70-31. (RCS OSD-1366)

(Sec. 3012, 70A Stat 157; 10 U.S.C. 3012)

[44 FR 50338, Aug. 28, 1979]

### § 209.345 Water resource policies and authorities.

#### REIMBURSEMENT FOR ADVANCE NON-FEDERAL PARTICIPATION IN CIVIL WORKS PROJECTS

(a) *Purpose.* This regulation gives general instructions on use of section 215 of the Flood Control Act of 1968 (Pub. L. 90-483) to reimburse a non-Federal public body for construction of part of an authorized Federal project, part of an authorized Federal project. It establishes general policies, outlines procedures to be followed in reaching

an agreement with an eligible non-Federal entity, and provides guidance on the provisions of such an agreement. All authorized projects are subject to this Act and regulation.

(b) *Applicability.* This regulation applies to all field operating agencies having Civil Works responsibilities.

(c) *References.* (1) Section 215, FCA of 1968 (Pub. L. 90-483, 42 U.S.C. 1962d-5a.). (APP A, this regulation).

(2) Senate Document No. 10, 90th Congress, 1st Session, "Study of Federal Reimbursement Policy for Work by States and other Non-Federal Entities on Authorized Water Resources Projects."

(3) Section 221, FCA of 1970 (Pub. L. 91-611, 42 U.S.C. 1962d-5b).

(4) ER 405-2-680.

(5) ER 1140-2-301.

(6) ER 1180-1-1, (para. A-310, App. A).

(d) *General policy.* (1) The specific limitations put upon the allotment of funds authorized by section 215 indicate that only limited use should be made of the authority. It will, therefore, be Corps of Engineers policy to restrict the use of this authority to cases that meet all of the following conditions:

(i) The work, even if the Federal Government does not complete the authorized project, will be separately useful or will be an integral part of a larger non-Federal undertaking that is separately useful;

(ii) The work done by the non-Federal entity will not create a potential hazard;

(iii) Approval of the proposal will be in the general public interest;

(iv) Only work commenced after project authorization and execution of an agreement pursuant to this Regulation will be eligible for reimbursement or credit;

(v) Proposed reimbursement will not exceed the amount that the District Engineer considers a reasonable estimate of the reduction in Federal expenditures resulting from construction of the project component by the non-Federal entity.

(2) Before finally approving any agreement under section 215, the Chief of Engineers will inform the Secretary of the Army and the Chairman (Senate and House), Subcommittee on Public

Works, Committee on Appropriations of the proposed arrangements. The Chief of Engineers will not sign an agreement until Secretarial and Committee concurrences are obtained.

(3) Section 215 authority will not be used where it might appear to circumvent the intent of Congress. It will not, for example, be used to initiate work on projects to which Congressional committees have indicated general opposition or refused to provide requested funds, or to accelerate portions of work on which construction has already been commenced by the Federal Government.

(4) Section 215(f) authorizes a specific allotment of funds to reimburse non-Federal entities for work accomplished under the Section. No allotment has been established, nor is one proposed at this time. Until one is, and firm procedures are established, any agreement with a non-Federal entity shall call for reimbursement, or for credit against required contributions, only when construction funds for the Federal project which incorporates the part constructed by the non-Federal entity are appropriated and allocated.

(5) The non-Federal entity will normally be required to develop the design memorandum, engineering plans, and specifications for the work it proposes to undertake. Subject to policies established in ER 1140-2-301, as modified in paragraph (e)(2) of this section, the District Engineer may provide engineering services with funds advanced by the non-Federal entity if he determines it to be impracticable for the entity to obtain the services elsewhere. Non-Federal engineering and overhead costs for the part of the Federal project that the non-Federal entity proposes to construct will be part of the reimbursement agreement.

(6) The agreement shall include local cooperation items required by the project authorization and by Section 221, FCA of 1970.

(7) Reimbursement of non-Federal work under Section 215 is not applicable to small projects authorized under the general authority of Section 107, Pub. L. 86-645, as amended. (33 U.S.C. 577); Section 205, Pub. L. 858, 80th Congress, as amended, (33 U.S.C. 701s); and Section 103, Pub. L. 87-874, as amended,

(33 U.S.C. 426g); and Section 14, Pub. L. 79-526 (33 U.S.C. 701r).

(e) *Procedures.* (1) Non-Federal entities desiring reimbursement under Section 215 for constructing part of an authorized Federal project should confer with the District Engineer and submit a written proposal to him. This proposal will form the basis for consulting, as needed, with OCE and for deciding whether the proposal meets the policy criteria of paragraph (d) of this section, and whether to continue under the procedures below and what sequence to follow.

(2) If Federal preconstruction planning funds are not available to the project and it is considered impractical for the non-Federal entity to prepare a partial design memorandum and/or plans and specifications, the draft agreement may propose that this work be accomplished by the Corps of Engineers through an advance of non-Federal funds for this purpose. Certain advances of funds will be necessary, in any event, to cover other costs which are required on the part of the Corps of Engineers. Paragraph 11 of ER 1140-2-301 requires that requests to the Appropriations Committees for approval of advances of funds should normally be submitted to the Committees by non-Federal interests outside of Corps of Engineers channels. An exception to this procedure will be made in the case of Section 215 proposals in that the request for approval of advances will be made a part of the request to the committees for approval of the overall arrangement referred to in paragraph (d)(2) of this section. Thus, proposed advances of funds for the following purposes will be clearly set forth in the draft agreement: (i) Preparation of a partial design memorandum and/or plans and specifications (ii) corps review of design scheduled for accomplishment by local interests, and (iii) periodic and final inspections.

(3) The District Engineer will submit for review an unsigned draft agreement to OCE. All agreements will be prepared for the signature of the Chief of Engineers.

(4) The District Engineer will be notified of any changes in the draft agreement that the Chief of Engineers may require, and will negotiate a final

agreement with the non-Federal entity. After signature of the agreement by the non-Federal entity, the District Engineer will forward three copies to HQDA (DAEN-CWO-C) WASH DC 20314, for signature by the Chief of Engineers.

(5) Upon receipt from OCE of the full executed agreement, the District Engineer will transmit the signed agreement to the non-Federal entity.

(6) The Division Engineer will review the (partial) design memorandum, and, if it meets the relevant criteria in paragraph (d)(1) of this section, will submit it to OCE with the recommendations on whether or not the work may proceed subject to reimbursement under the agreement.

(7) The Division Engineer will approve plans and specifications.

(8) The non-Federal entity will award contract.

(9) The District Engineer will conduct periodic and final inspections.

(10) Upon completion of the local work, the District Engineer will certify the cost data, and that performance has been in accordance with the agreement.

(f) *Agreements.* Agreements under Section 215 should follow the general format presented in paragraph (c)(6) of this section, adapted as warranted by the specific case. Each agreement shall:

(1) Expire 3 years after the date of execution if the non-Federal entity has not commenced the work contemplated by the agreement.

(2) State the time allowed for completion of the work. A reasonable time shall be allowed, but normally not over 2 construction seasons.

(3) Fully describe the work to be accomplished by the non-Federal entity and specify the manner in which it will be carried out.

(4) The agreement will specify that reimbursement by the Federal Government will not exceed \$1,000,000.

(5) Provide for necessary review of designs, plans, and specifications, by the District Engineer.

(6) Provide for examination and review of proposed contracts and for inspection of the work by the District Engineer for conformance with the terms of the agreement.

(7) State fully the basis on which reimbursement or credit shall be determined, and provide for the final adjustment when the balance of the Federal project is constructed. If the improvement proposed by the non-Federal entity includes work that will not become a part of the Federal project, the means of determining the part eligible for reimbursement shall be fully defined.

(8) State that such reimbursement shall depend upon appropriation of funds applicable to the project and shall not take precedence over other pending projects of higher priority.

(9) Specify that reimbursement or credit for non-Federal work shall apply only to that work undertaken after execution of the agreement. The term "work" shall include advance engineering and design as well as actual construction.

(10) State that the agreement is not to be construed as committing the United States to reimbursement if the Federal project is not undertaken, or if the Federal project should be modified in such a way that the work performed by the non-Federal entity does not constitute a part thereof.

(11) Contain applicable equal employment clauses from Armed Services Procurement Regulations.

(g) *Nature and amount of reimbursement.* (1) The non-Federal entity may be reimbursed by a payment of cash, or, preferably, by reductions in any non-Federal contribution to the Federal project that may have been required by the legislation authorizing it, or by a combination of cash and such reductions.

(2) The amount of reimbursement shall equal the approved expenditures made by the non-Federal entity for work that would have been accomplished at Federal expense if the entire project were carried out by the Corps of Engineers, and as covered in the agreement under paragraphs (f) (7) and (10) of this section. The amount of reimbursement will not exceed, however, the amount that the District Engineer finds to be a reasonable estimate of the reduction in Federal expenditure resulting from construction by the non-Federal entity.

APPENDIX A TO PART 209—PUBLIC LAW 90-483, 90TH CONGRESS, S. 3710, AUGUST 13, 1968

An act authorizing the construction, repair, and preservation of certain public works on rivers and harbors for navigation, flood control, and for other purpose. (82 Stat. 731).

\* \* \* \* \*

Sec. 215. (a) The Secretary of the Army, acting through the Chief of Engineers, may, when he determines it to be in the public interest, enter into agreement providing for reimbursement to States or political subdivisions thereof for work to be performed by such non-Federal public bodies at water resources development projects authorized for construction under the Secretary of the Army and the supervision of the Chief of Engineers. Such agreements may provide for reimbursement of installation costs incurred by such entities or an equivalent reduction in the contributions they would otherwise be required to make, or in appropriate cases, for a combination thereof. The amount of Federal reimbursement, including reductions in contributions, for a single project shall not exceed \$1,000,000.

(b) Agreements entered into pursuant to this section shall (1) fully describe the work to be accomplished by the non-Federal public body, and be accompanied by an engineering plan if necessary therefor; (2) specify the manner in which such work shall be carried out; (3) provide for necessary review of design and plans, and inspection of the work by the Chief of Engineers or his designee; (4) state the basis on which the amount of reimbursement shall be determined; (5) state that such reimbursement shall be dependent upon the appropriation of funds applicable thereto or funds available therefor, and shall not take precedence over other pending projects of higher priority for improvements; and (6) specify that reimbursement or credit for non-Federal installation expenditures shall apply only to work undertaken or Federal projects after project authorization and execution of the agreement, and does not apply retroactively to past non-Federal work. Each such agreement shall expire three years after the date on which it is executed if the work to be undertaken by the non-Federal public body has not commenced before the expiration of that period. The time allowed for completion of the work will be determined by the Secretary of the Army, acting through the Chief of Engineers, and stated in the agreement.

(c) No reimbursement shall be made, and no expenditure shall be credited, pursuant to this section, unless and until the Chief of Engineers or his designee, has certified that the work for which reimbursement or credit is

requested has been performed in accordance with the agreement.

(d) Reimbursement for work commenced by non-Federal public bodies no later than one year after enactment of this section, to carry out or assist in carrying out projects for beach erosion control, may be made in accordance with the provisions of section 2 of the Act of August 13, 1946, as amended (33 U.S.C. 426f). Reimbursement for such work may, as an alternative, be made in accordance with the provisions of this section, provided that agreement required herein shall have been executed prior to commencement of the work. Expenditures for projects for beach erosion control commenced by non-Federal public bodies subsequent to one year after enactment of this section may be reimbursed by the Secretary of the Army, acting through the Chief of Engineers, only in accordance with the provisions of this section.

(e) This section shall not be construed (1) as authorizing the United States to assume any responsibilities placed upon a non-Federal body by the conditions of project authorization, or (2) as committing the United States to reimburse non-Federal interests if the Federal project is not undertaken or is modified so as to make the work performed by the non-Federal Public body no longer applicable.

(f) The Secretary of the Army is authorized to allot from any appropriations hereafter made for civil works not to exceed \$10,000,000 for any one fiscal year to carry out the provisions of this section. This limitation does not include specific project authorizations providing for reimbursement.

\* \* \* \* \*

[42 FR 24050, May 12, 1977]

## PART 210—PROCUREMENT ACTIVITIES OF THE CORPS OF ENGINEERS

Sec.

210.1 Advance notice to prospective bidders.

210.2 Notice of award.

210.3 Notice to proceed.

210.4 Rules of the Corps of Engineers Board of Contract Appeals for cases not subject to the Contract Disputes Act of 1978.

210.5 Rules of the Corps of Engineers Board of Contract Appeals for cases subject to the Contract Disputes Act of 1978.

AUTHORITY: Secs. 2301-2314, 3012, 70A Stat. 127-133, 157; 10 U.S.C. 2301-2314, 3012.

### § 210.1 Advance notice to prospective bidders.

In connection with all construction contracts estimated to cost \$100,000 or

more for which an invitation is scheduled to be issued, an advance notice to prospective bidders will be prepared sufficiently in advance of the actual issuance of the invitation to stimulate interest on the part of the greatest possible number of contractors. Advance notices may also be prepared on projects estimated to cost less than \$100,000 and for supplies where considered desirable. ENG Form 3132-R or ENG Form 3133-R [set out in paragraphs 205 and 206, Appendix A, Engineer Contract Instructions (ER 1180-1-1)] will be used to send advance notices to prospective bidders. Lengthy notices may be reproduced and mailed using ENG Form 3133-R as a foldover wrapper fastened with a wire staple. Advance notices will contain the information required by ENG Form 3132-R, but additional information may be added as appropriate. The advance notices will:

(a) Describe the proposed work in sufficient detail to permit prospective general contractors, subcontractors and suppliers to determine reasonably whether the work is of a nature and volume to warrant their buying plans;

(b) Specify the date by which bidders should return the request card in order to receive a complete bid set;

(c) State the various locations (offices) where plans will be on public display, available for inspection without charge; and

(d) Include for construction contracts a statement as to the approximate value of the proposed construction. That statement of value shall be in increments as follows: (1) Less than \$25,000; (2) the nearest multiple of \$25,000 up to \$100,000; (3) the nearest multiple of \$100,000 from \$100,000 to \$1 million; (4) the nearest multiple of \$500,000 for from \$1 million to \$10 million; (5) over \$10 million for all projects of greater estimated value.

Information on several projects for which invitations are scheduled to be issued may be grouped in one advance notice provided that information on any project or projects is not unduly delayed in order to be grouped with others. When an advance notice is used to circularize bidders, copies of the invitation, when issued, will be furnished only to those prospective bidders who
